EVOLUTION
DATA & COMMUNICATIONS

01 — OVERVIEW

Enforcement-First Field-Service OS

An enforcement-first operations platform for an electrical, security, AV & telecom group — five portals over one decision gate, spanning quote-to-cash, procurement, workforce and billing.

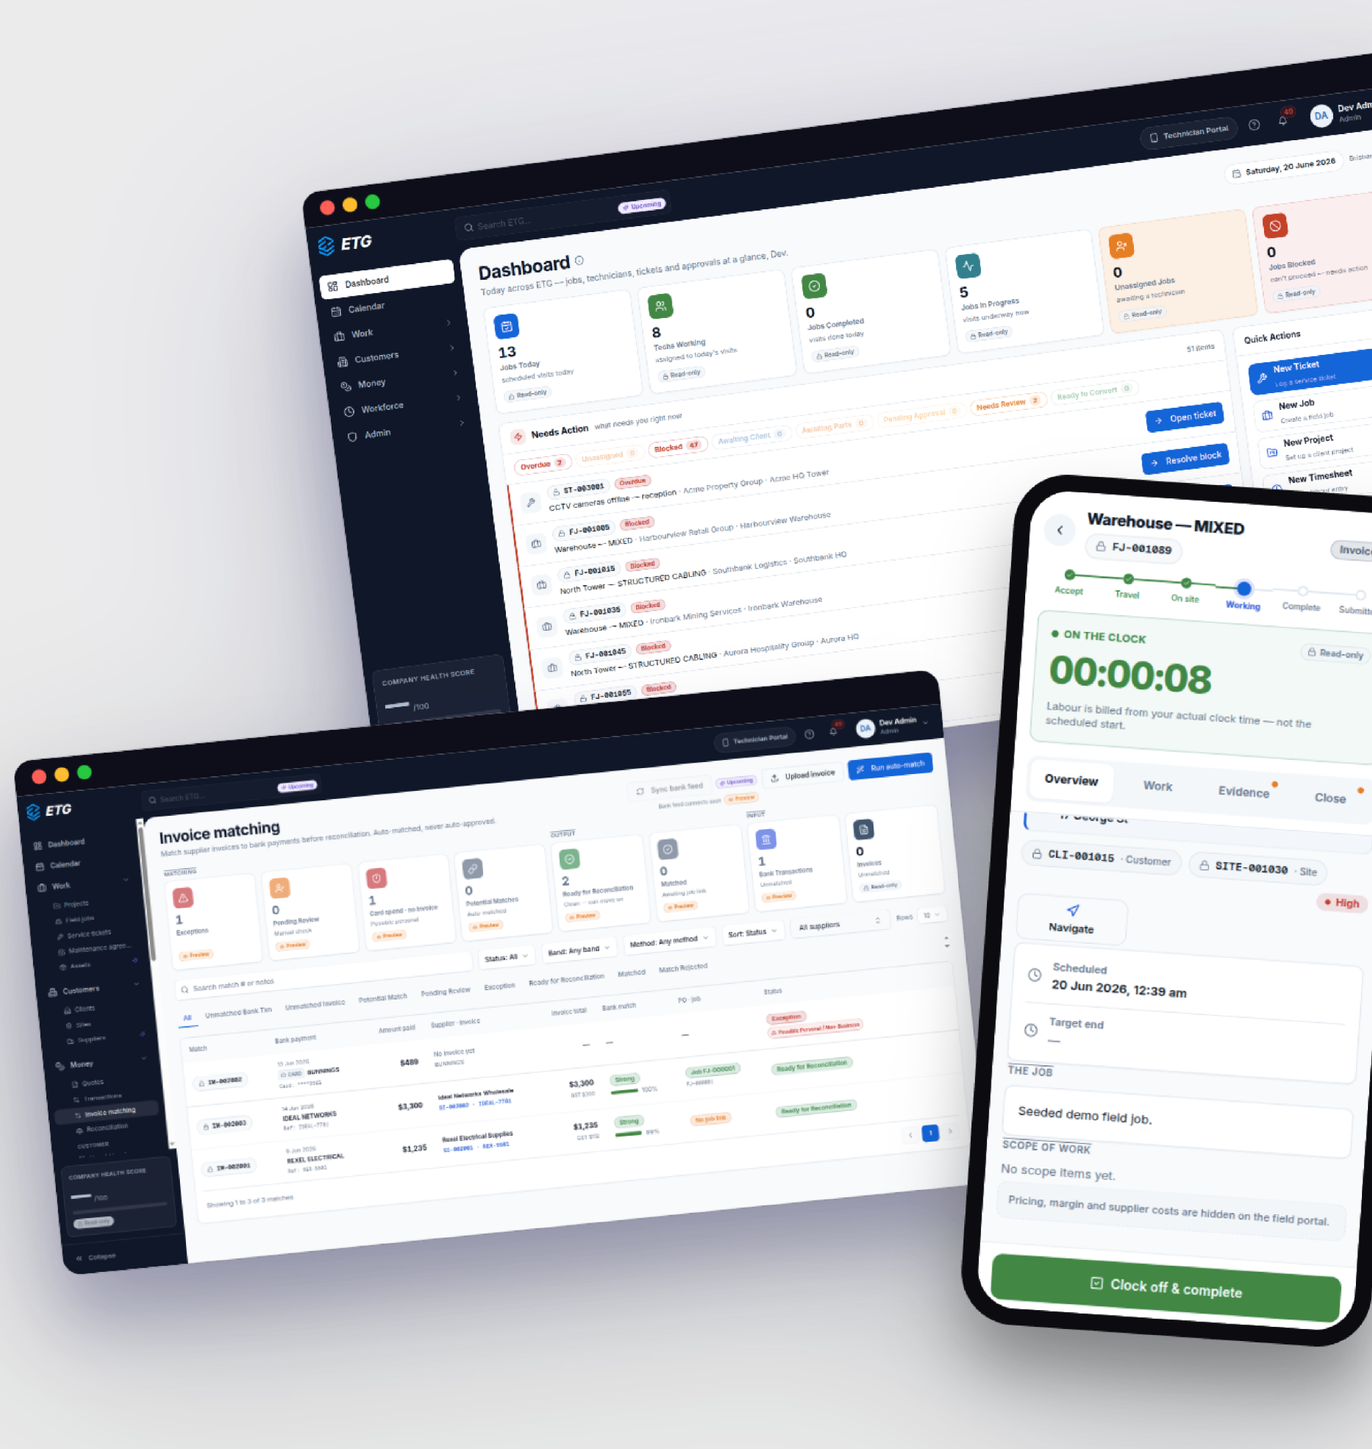

ROLE **Sole architect, full-stack**

227
PRISMA MODELS

1,200+
TRPC PROCEDURES

44K+
AUTOMATED TESTS

- Five portals — ops, technician, client, subcontractor, public links
- Quote-to-cash, procurement and dual-sided billing behind one gate
- Workforce, assets, compliance and governance — one 227-model schema

hyss

02 — OVERVIEW

AV & Live Events Staffing Platform

Event companies need to staff certified freelance crew for live events — with conflict-free scheduling, compliant pay and automated payouts — on web and mobile alike.

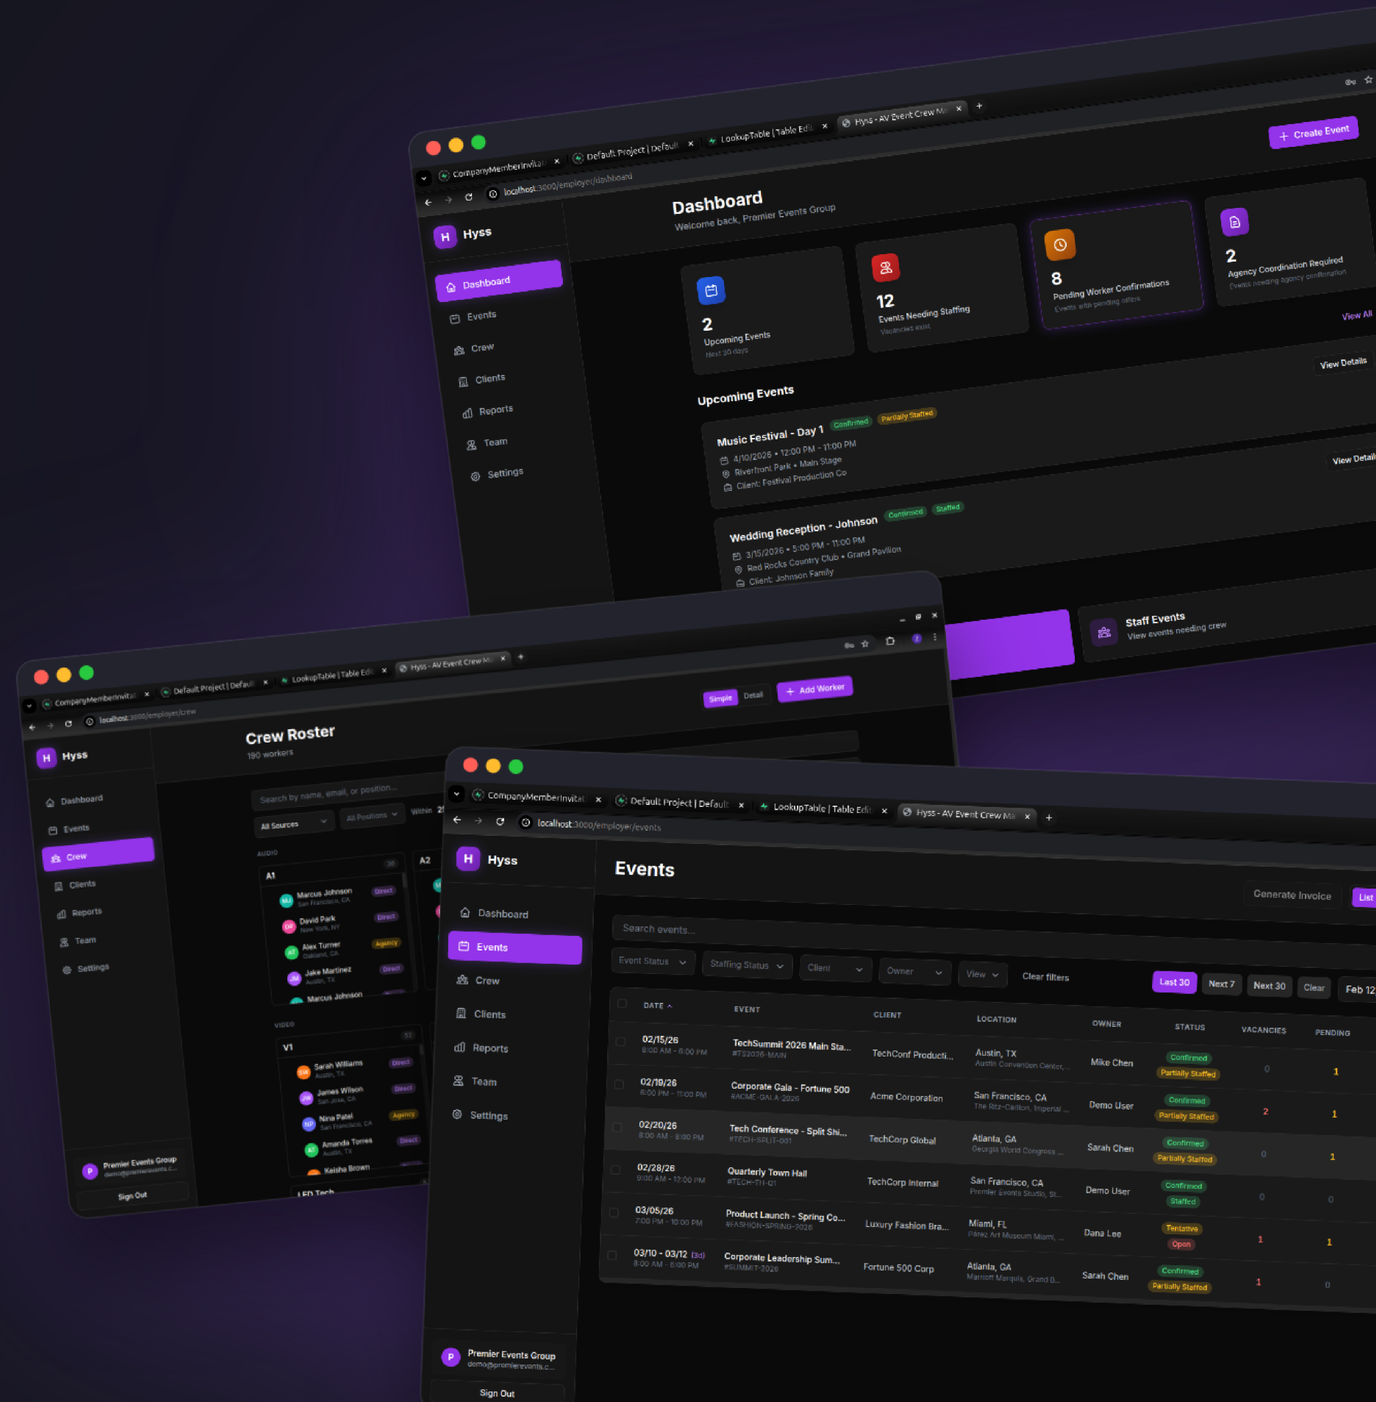

ROLE **Lead full-stack engineer**

93
DATA MODELS

~340
TRPC PROCEDURES

3
PLATFORMS · ONE CODEBASE

- Wizard-driven event creation & recurring shifts
- Competency-based matching with conflict detection
- Freelancer calendars, time-off requests & ICS sync

conek

03 — OVERVIEW

Quotes & Projects Tool for A-SAFE

Own the full sales lifecycle and project invoicing across A-SAFE's tool ecosystem — CRM, Drawing Tool and Route 66 — with quote-to-cash handled end to end.

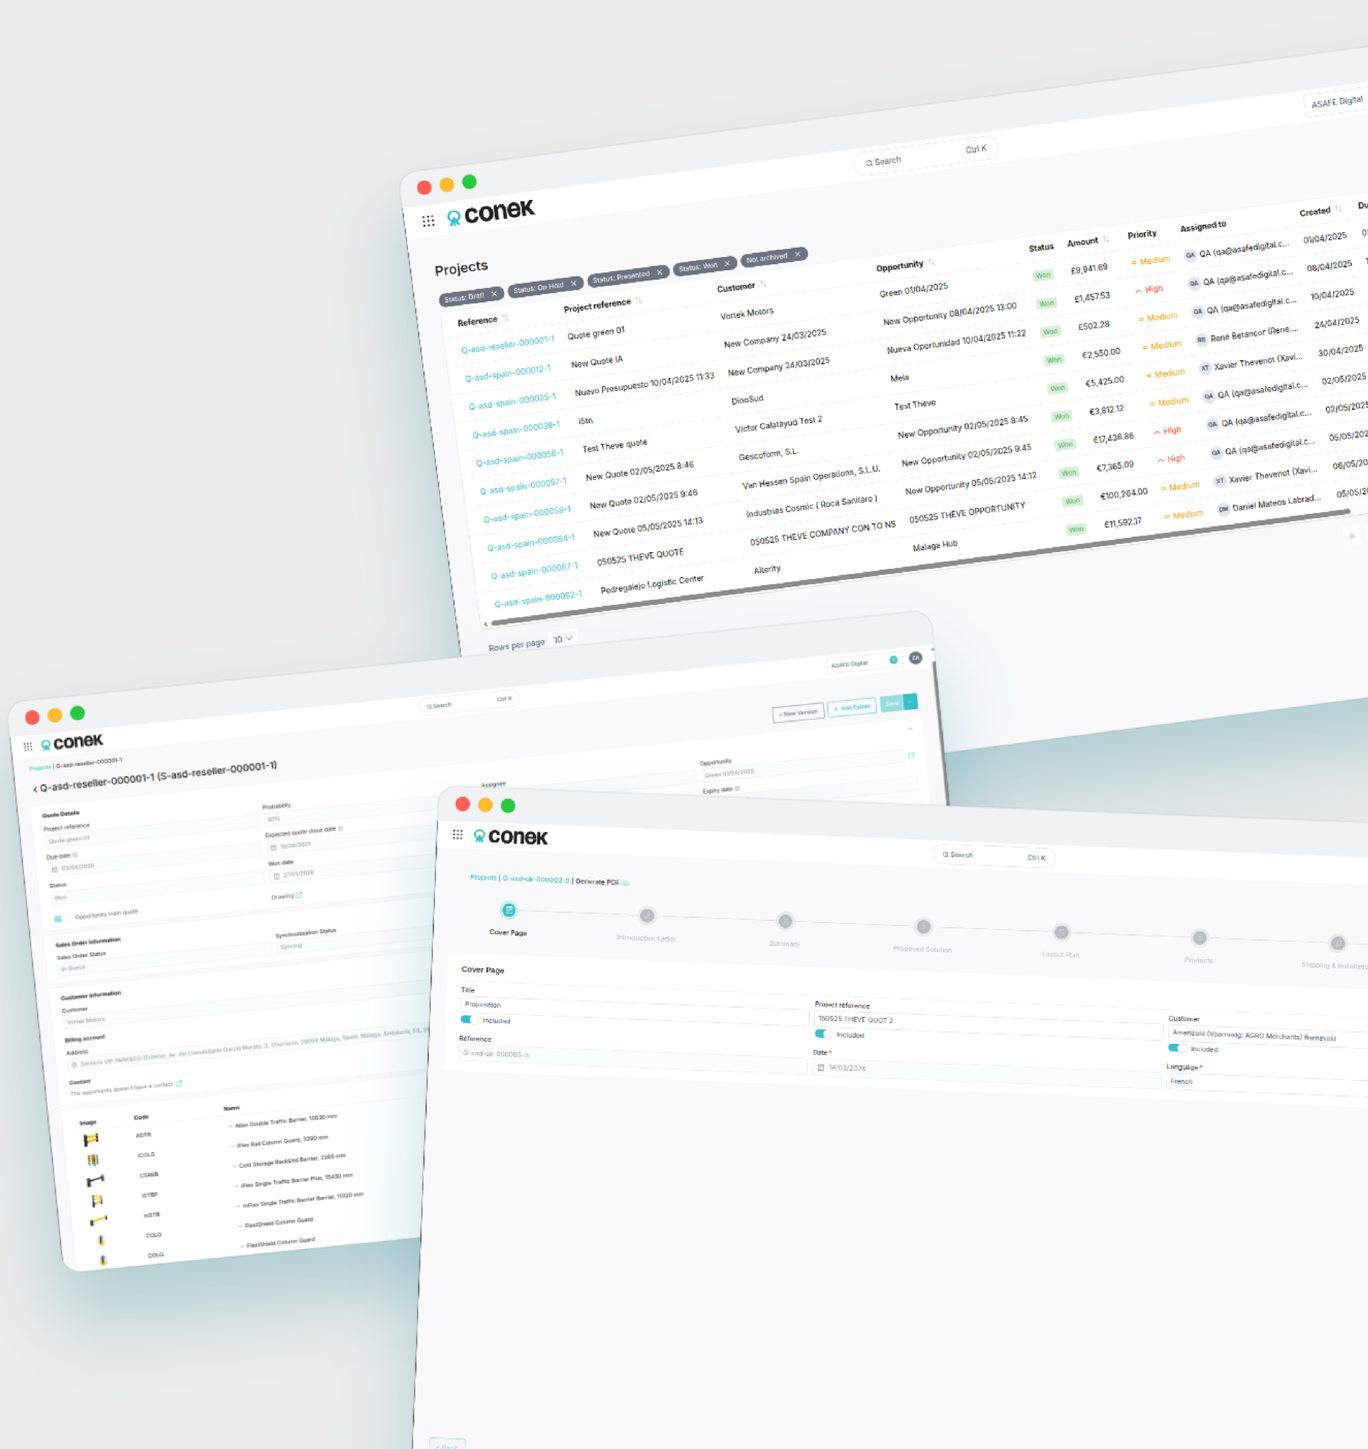

ROLE **Full-stack engineer**

<100ms
INTER-SERVICE LATENCY

500+
AUTOMATED TESTS

95%
TEST COVERAGE

- Sales lifecycle — quote through to sales order
- Order items, project invoicing & quote-PDF generation
- Analytics & integrations — CRM, Drawing Tool, Route 66

Sportefy

04 — OVERVIEW

Sports Venue Booking & Matchmaking

A B2B2C platform live in Pakistan — a consumer Flutter app plus a Next.js admin dashboard on a versioned NestJS API. Book venues, find matches, pay.

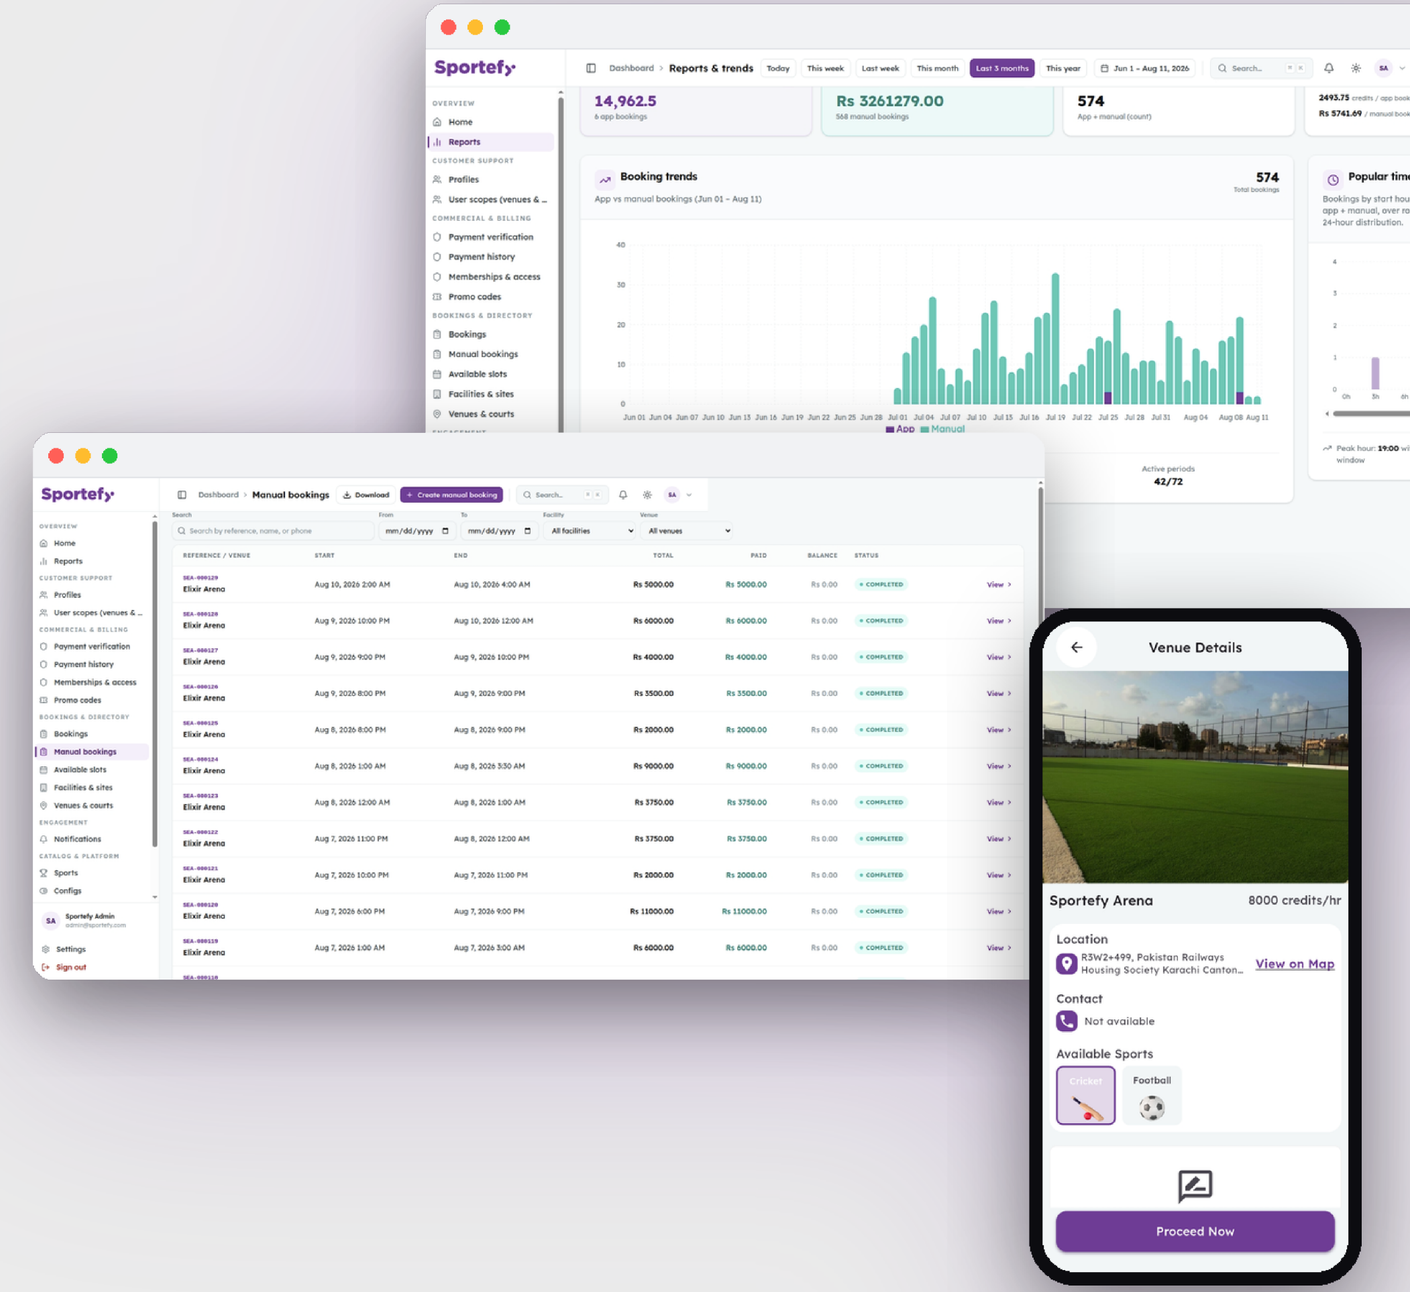

ROLE **Full-stack & mobile engineer**

48
DOMAIN MODULES

190+
VERSIONED /v1 ENDPOINTS

823
FLUTTER TESTS

- Consumer Flutter app — booking, slots, QR check-in & wallet, offline-first
- Realtime matchmaking & match chat — Supabase Realtime + RLS
- Next.js admin dashboard over a versioned /v1 API, one shared RBAC matrix

PLEXOR

05 — OVERVIEW

AI-Based Surveillance System

Retail shrinkage from employee & customer theft and POS under-ringing is hard to catch live. A multi-camera computer-vision platform detects it and routes alerts to store and district managers.

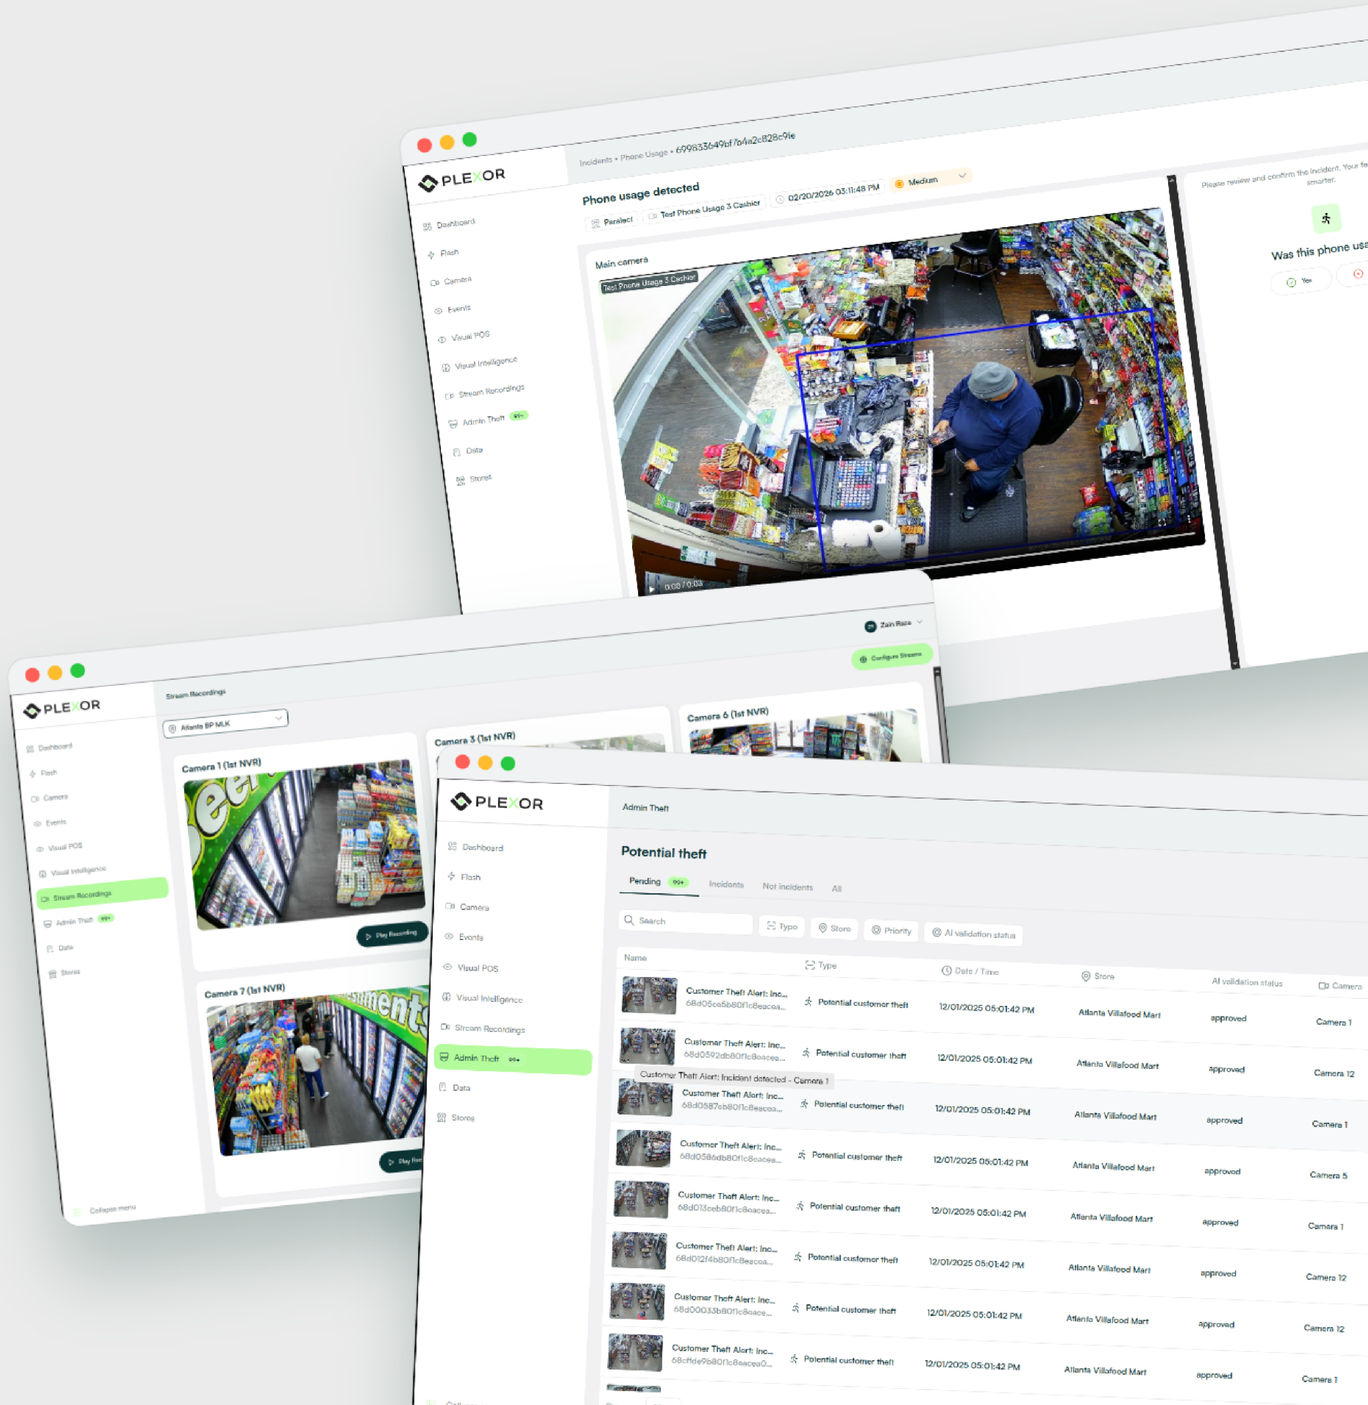

ROLE **Full-stack engineer**

100+
STORES MONITORED

~700ms
REALTIME INFERENCE

37+
DETECTION MODELS

- Theft detection across employees & customers
- Phone-usage & loitering alerts with live recording streams
- Visual POS & under-ringing detection
