FLUTTER
TESTS

- ◆ Consumer Flutter app — booking, slots, QR check-in & wallet, offline-first
- ◆ Realtime matchmaking & match chat — Supabase Realtime + RLS
- ◆ Next.js admin dashboard over a versioned /v1 API, one shared RBAC matrix

Two clients, one versioned contract

STACK

MOBILE

Flutter · BLoC

ADMIN

Next.js · React · Tailwind

BACKEND

NestJS 11 · Prisma 7 · Postgres

REALTIME ·
PAY

Supabase (Realtime · RLS) · Paymob

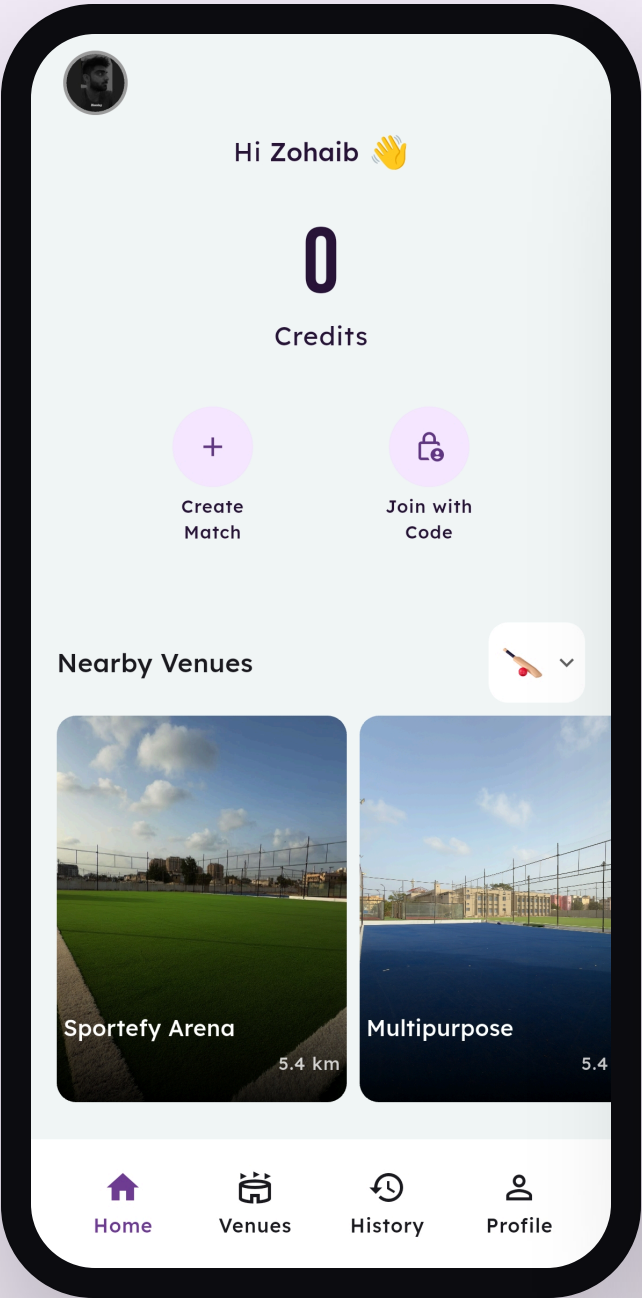

KEY DECISIONS

- 01 Monorepo — NestJS backend & Next.js admin share one typed contract & RBAC package
- 02 Additive-only /v1 contract + server-driven version gating
- 03 OpenAPI drift gates enforced in CI

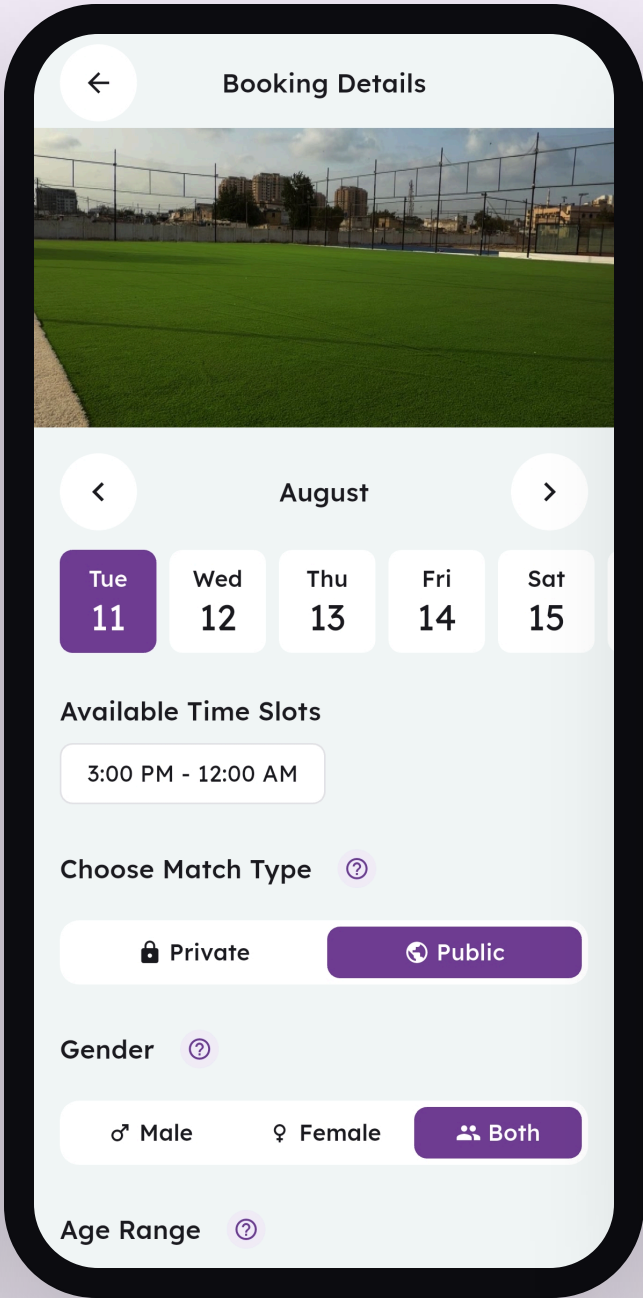

Across app and dashboard

Sportefy

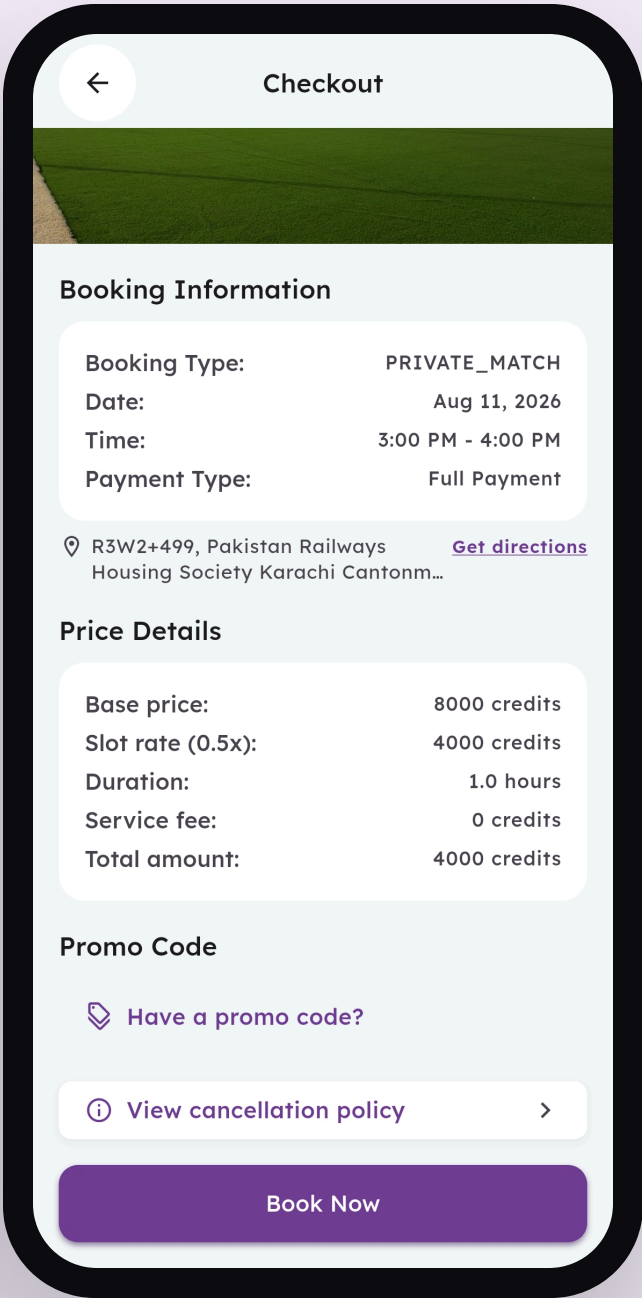

CONSUMER APP • FLUTTER

Home – credits & nearby venues
