01 — OVERVIEW

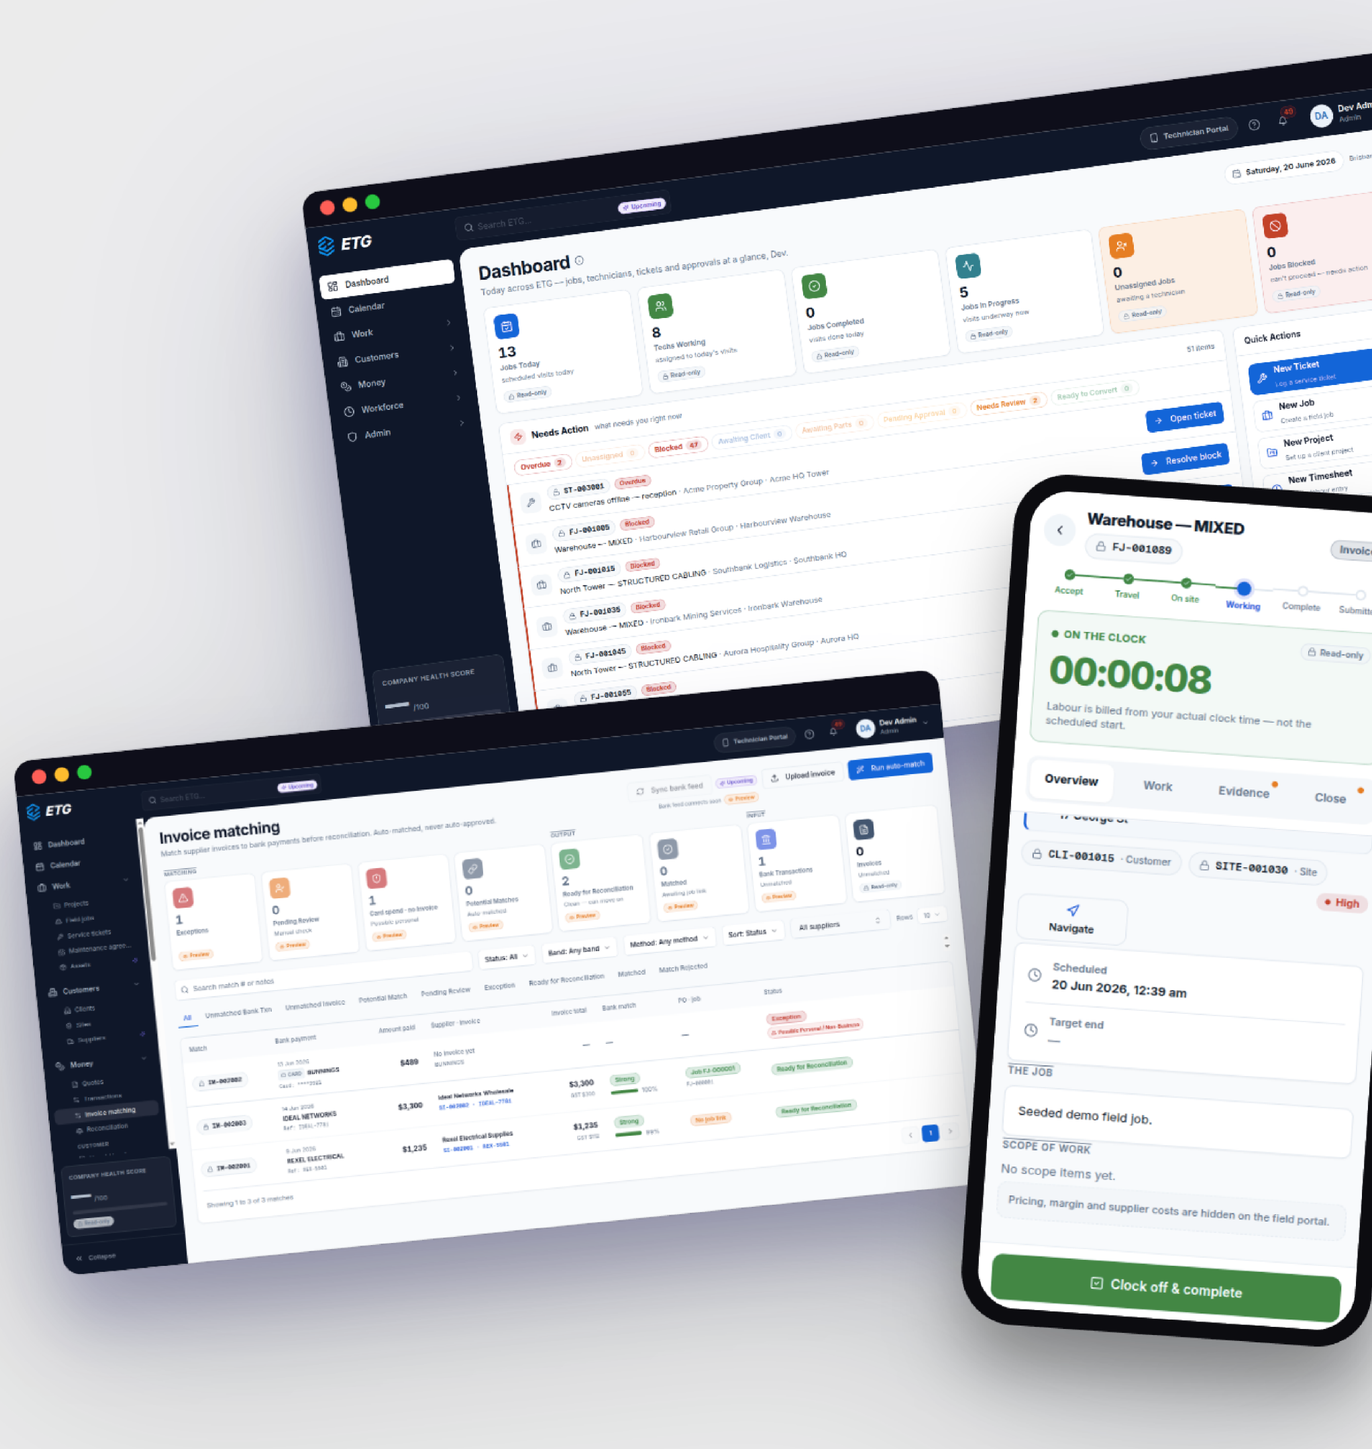

Enforcement-First Field-Service OS

An enforcement-first operations platform for an electrical, security, AV & telecom group — five portals over one decision gate, spanning quote-to-cash, procurement, workforce and billing.

ROLE **Sole architect, full-stack**

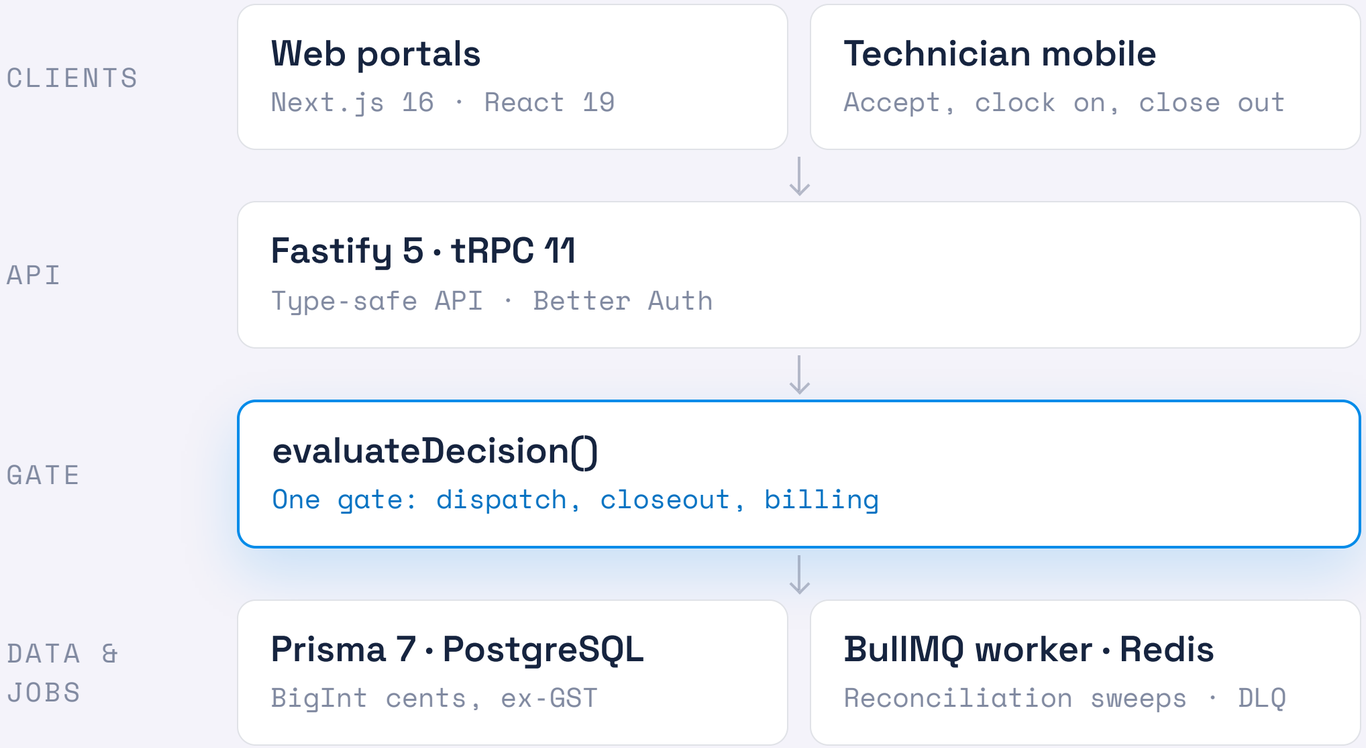

235	1,500+	52K+
PRISMA MODELS	TRPC PROCEDURES	AUTOMATED TESTS

- Five portals — ops, technician, client, subcontractor, public links
- Quote-to-cash, procurement and dual-sided billing behind one gate
- Workforce, assets, compliance and governance — one 235-model schema

01 — ARCHITECTURE & STACK

One enforcement gate behind every workflow

KEY DECISIONS

01 One pure decision engine gates every transition, and every block or override is audited

02 Money as BigInt integer cents, ex-GST: no floating point in any financial path

03 Lint-enforced layering: the UI never imports Prisma, routers never query the DB

04 Event-driven workers with a dead-letter queue and replay tooling

STACK

FRONTEND: Next.js 16 · React 19

BACKEND: Fastify 5 · tRPC 11 · Prisma 7

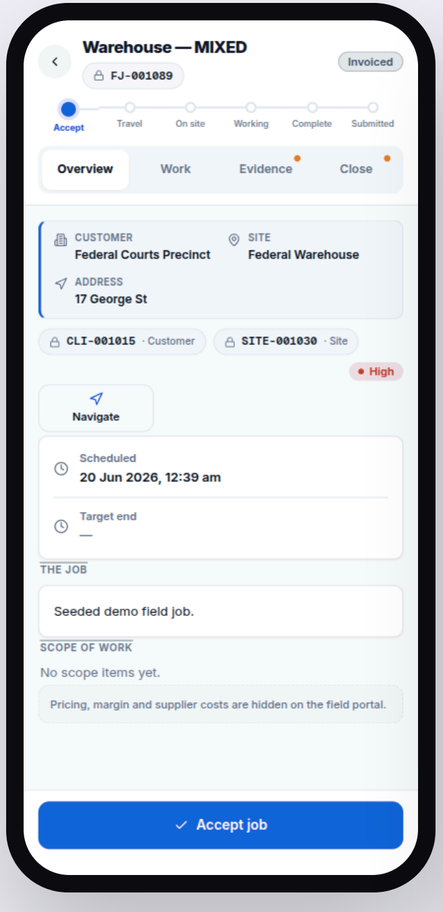

DATA: PostgreSQL · BullMQ · Redis

INFRA: Better Auth · Airwallex · Docker · Railway

01 — IMPACT

Margin control, enforced

$5k/wk
BILLING LEAKAGE CLOSED

1,500+
TRPC PROCEDURES

52K+
AUTOMATED TESTS

Stops an estimated $5k a week of margin leakage by blocking unbillable or non-compliant work before it ships, backed by 52,000+ tests across 4,700+ test files.

WHAT SHIPPED

- One audited decision gate for dispatch, closeout and billing
- Two-hop bank-feed to supplier-invoice reconciliation, scored
- Every block and override logged with actor and reason
- Production smoke tests gate every release
